

January is

NATIONAL RADON ACTION MONTH

Protect your family.
Test Your Home.

www.epa.gov/radon/nram

Radon is the #1 cause for Lung Cancer among Non-Smokers and the #2 cause of Lung Cancer in America.

Radon is a radioactive gas. It comes from the natural decay of uranium that is found in nearly all soils. It typically moves up through the ground to the air above and into your home through cracks and other holes in the foundation such as:

1. Cracks in solid floors
2. Construction joints
3. Cracks in walls
4. Gaps in suspended floors
5. Gaps around service pipes
6. Cavities inside walls
7. The water supply

Nearly 1 out of every 15 homes in the U.S. is estimated to have elevated radon levels.

The **Beverly Fund Lung Cancer Foundation** is offering a **FREE** radon test kit to anyone during National Radon Action Month – January 2010.

Limit 1 test kit per household while supplies last.

For a free radon test kit, provide us with:

- Your Name
- Your Address

Email us: info@beverlyfund.org

Or

Postal Mail:

The Beverly Fund
PO Box 330266
San Francisco, CA 94133-0266
